

Makeup Removal Study, MS211-3, 17 Jun 2009

Cowie R., Bailey M., Farrow T.

Ethel St. Laboratories, Headwaters R & D Inc.

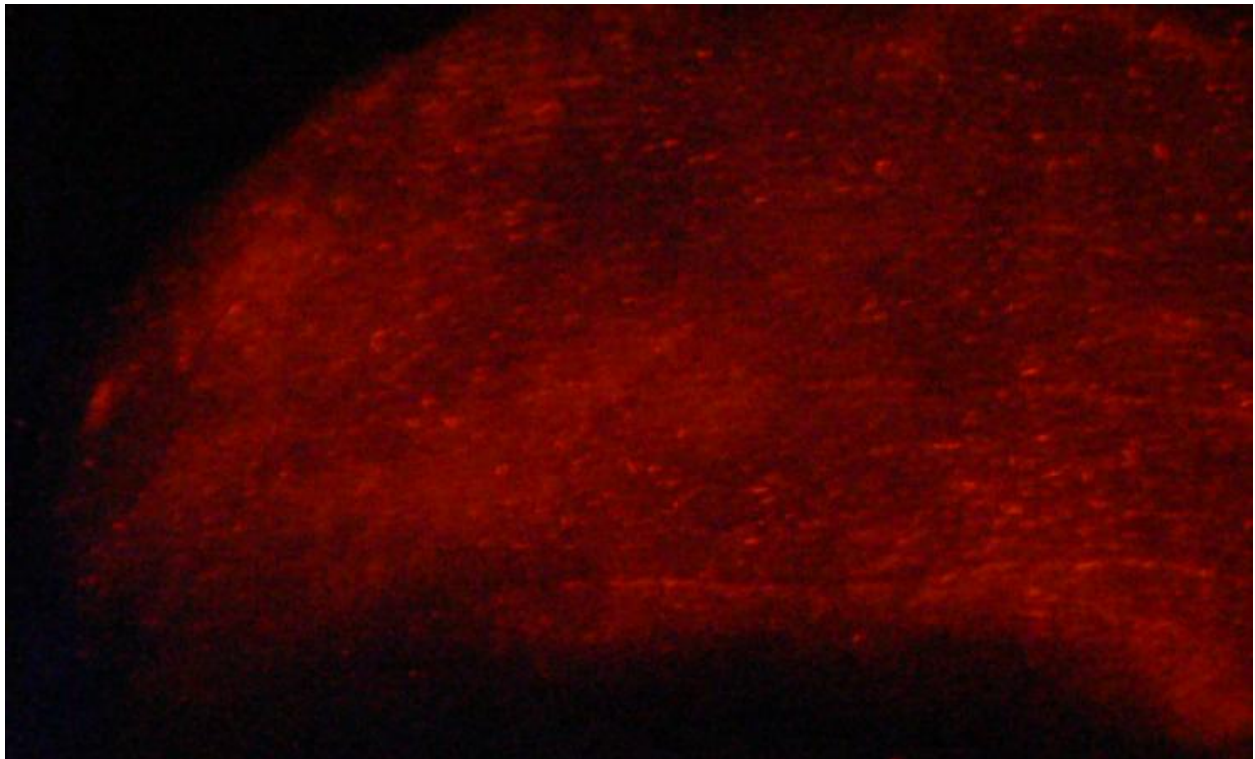

Hypothesis:

Can the effectiveness of the Body Essentials FM-360 Face Massager and Body Essentials Gentle Cleansing Gel be demonstrated using UV glowing makeup?

Method:

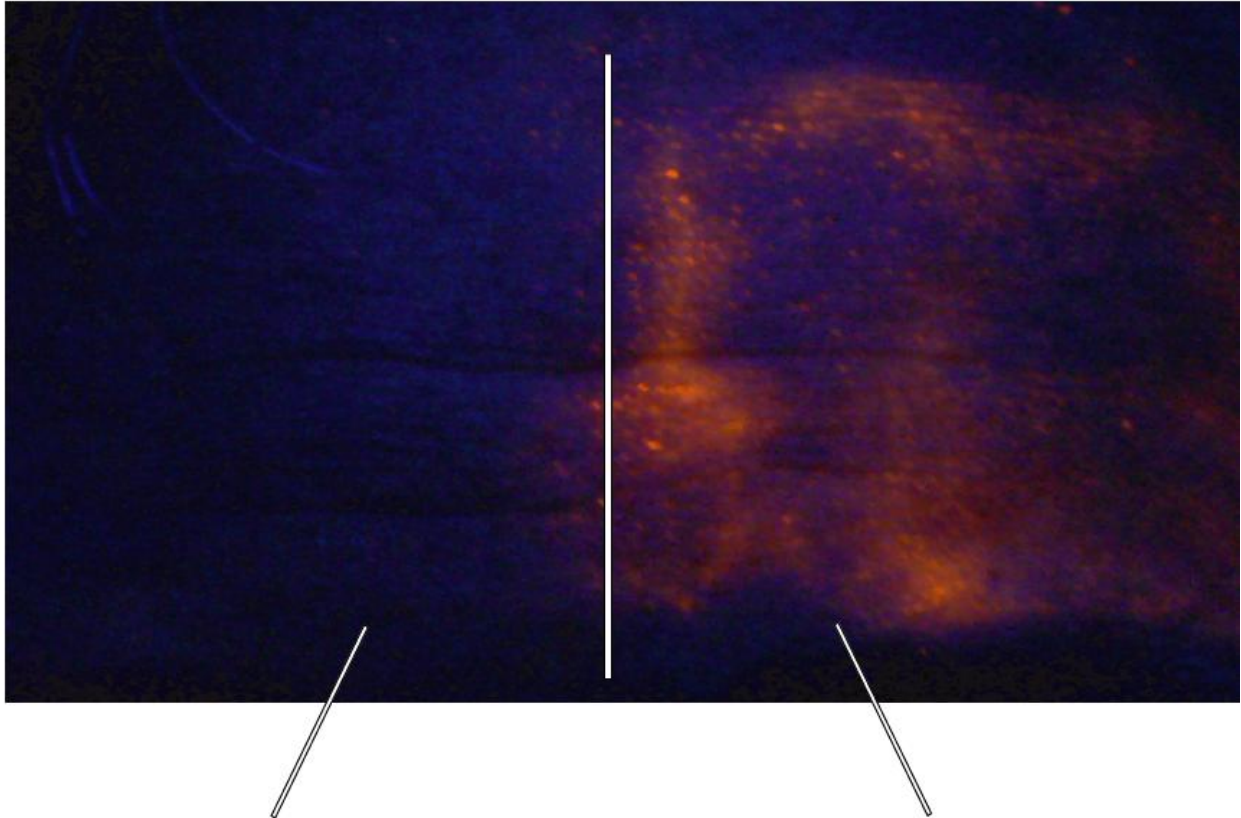

UV glowing makeup was applied evenly to the test subject's forehead. Glowing makeup was used because trace amounts of makeup remaining after cleaning would be readily apparent when illuminated with an ultraviolet (UV) "black light". A "black light" photograph of the applied makeup was taken before cleaning.

Subject P's Forehead Before Cleaning

One side of the test subject's forehead was cleaned by hand with soap and water. The other side was cleaned with the Body Essentials FM-360 Face Massager with the soft Brush attachment. Body Essentials Gentle Cleansing Gel was used.

Subject P's Forehead after Cleaning

This side cleaned with Body Essentials FM-360 Face Massager and Gentle Cleansing Gel.

This side cleaned by hand with soap and water. Notice the makeup remaining in fine lines and pores.

Conclusions

This study showed the effectiveness of the Body Essentials FM-360 Face Massager, as demonstrated through the use of glowing makeup and a UV "black light". The combination of the Face Massager brush head and the Gentle Cleansing Gel was most effective in removing all traces of makeup from our test subjects.
